INFORMATION POSTS

The policy of the Capital City of Warsaw

is targeted at eliminating social and health impact of addictions through limiting the use of psychotropic substances and HIV infections.

It is possible thanks to:

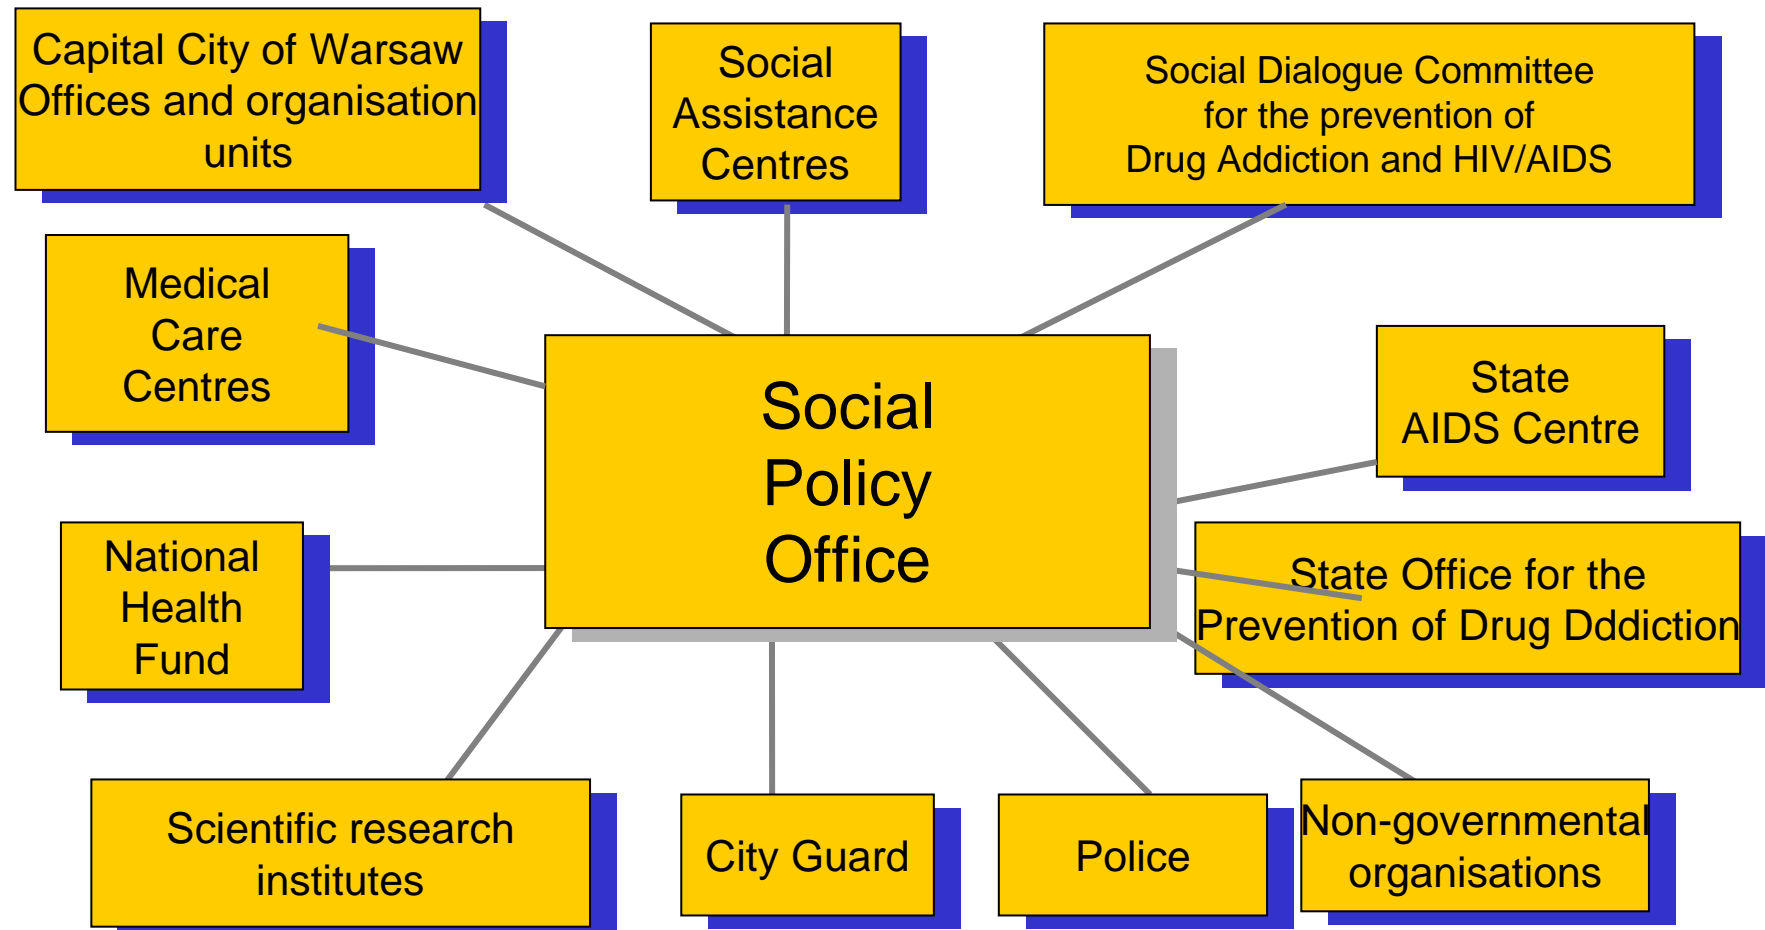

- System approach to addiction issues.
- Integration of institutions, services, and organisations responsible for the execution of tasks – multi-sector cooperation.
- Integration of actions for preventing addictions and HIV/AIDS.

The strategy of the Capital City of Warsaw is defined by:

- City Programme for the Prevention of Drug Addiction 2008-2011, and in districts: Local Programmes for the Prevention of Addictions.
- The tasks executed within the city and local programmes are compatible and relative to the current inhabitants' needs.

Multi-sector cooperation in Warsaw

HOW WERE THE PROGRAMMES DEVELOPED

City Programmes were developed based on the National Programme for the Prevention of Drug Addiction, with the Warsaw characteristics and needs of the inhabitants taken into account.

The programmes were not built 'at an office desk'. They were developed in cooperation with representatives of non-governmental organisations, health care centres, scientific research institutes, and Municipal Offices (Social Policy Office, Health Policy Office, Education Office). Social Dialogue Committees actively participated in the Social Dialogue Forum meetings.

City Programme for the Prevention of Drug Addiction 2008-2011

Passed by the Capital City of Warsaw Council

The strategic aim of the Programme is to limit of the use of drugs and connected social and health problems in Warsaw

IT COVERS THE EXECUTION OF TASKS WITHIN THREE AREAS

1. Prevention.
2. Treatment, rehabilitation and limiting the negative impact on health.
3. Post-rehabilitation and social aid.

Prevention – tasks for the years 2008-2010 (number of programmes – 12; budget € 396.668,00)

1. Information campaign in official and non-official places where young people meet.
2. Promotion of healthy lifestyle among peers by youth leaders.
3. Organisation of free time for young people with risky behaviour as an alternative to using psychoactive substances (among others – 12 student clubs).
4. Information and education campaign targeted at people undertaking risky behaviour under the influence of psychoactive substances, in clubs / pubs / dance clubs.

**Treatment, rehabilitation and limiting the negative impact on health- tasks for the years 2008-2010
(number of programmes – 11; budget € 190.221,00)**

1. Emergency actions and psychological help for people experimenting with psychoactive substances and their families.
2. Limiting the risk of negative impact on health due to the use of psychoactive substances by drug addicts.
3. Intoxicating and psychotropic substances addiction psychotherapy programmes, and opioid addiction psychotherapy programmes, for the people in substitution treatment programme – for Warsaw inhabitants.

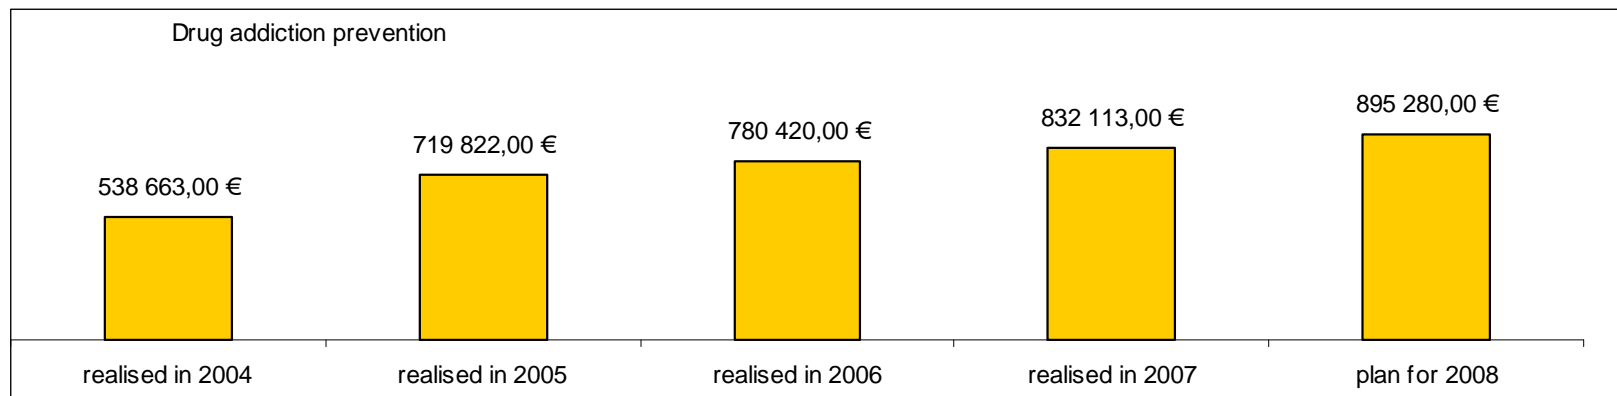

Post-rehabilitation and social aid – tasks for the years 2008-2010

(number of programmes – 4; budget € 313.300,00)

1. Post-rehabilitation help within the readaptation apartments programme (7 apartments).
2. Vocational development of the abstinent people addicted to psychoactive substances and as a means of counteracting social exclusion.
